ISO-Base™

"State-of-the-art" technology for protection of sensitive electronic equipment & instruments.

Individual plank assembly - (One side of a standard platform)

Each plank includes: A Top & Bottom Frame Section, (2)-Ball-N-Cone™ Bearings, (2) Frame Connectors up to 36" in length, & all hardware to assemble.

Individual plank assembly allows configuration of a "single unit platform"

Using two(2) planks (as above), or "ganged platforms" for multiple units in rows.

Example: a row of six(6) units would require seven(7) planks.

U.S. Patent # 5,599,106

Canada Patent # 1,143,408

Japan Patent # 3,467,513
